

JARVIS — every job, step by step

Read left to right: job name → what you say → steps → status. Risky steps always wait for your ALLOW. Updated 2 Oct 2026

1. TALK & ANSWER	you speak/type	ears: whisper -> text	brain reads lessons, skills, guides	answers / uses tools	voice speaks reply	Tested
2. PC CONTROL	'open X, click Y'	look_at_screen / see_buttons	click_text / click_button	type_text / press_keys	look again to verify	Tested
3. SAMASA CODEWORD	repeat job (e.g. open app)	samasa OPN-VRF(name)	open_app	wait 2.5 s	look_at_screen = proof	Tested
4. WEB RESEARCH	'find out X'	research / multi search	read pages (data, not orders)	short answer + sources		Tested
5. REMEMBER	'remember X'	write notes/<subject>.md	add line to daily/ note	recall later on asking		Tested
6. LEARN FROM FILES (+)	+ button: pic/PDF/text	saved in memory/inbox/	brain reads it	writes note + skill line	tells you where saved	Tested
7. SKILL GUIDE	'write a skill guide for X'	Opus writes notes/skills/X.md	use-when + tool steps	check + never	every brain (Qwen too) follows	Built
8. PHONE HANDS	'on my phone, open X'	PC queues phone job	app pulls it (Wi-Fi)	accessibility taps/types	result back to brain	Working
9. PHONE CALL (dial)	'call Mom'	ALLOW card on PC	app finds contact	phone dials	you talk	Built
10. CALL ON MY BEHALF	'call X, tell/ask Y'	brief read back, you OK	Phone Link call	Jarvis voice IN the call (virtual cable)	summary to you + diary	Design: TANTRA-04
11. BUILD A GITHUB PROJECT	'install <github link>'	project_start: download + PLAN.md	project_next per step (ALLOW)	project_ask on failure	done + how to run	Tested
12. CREATE NEW APP	'make me an app that...'	project_create: consultant writes code	PLAN.md checklist	project_next per step (ALLOW)	test + report	Built
13. APK ON PC	'build the app on PC'	find Android Studio Java + SDK	ALLOW	gradlew assembleDebug --no-daemon	APK -> Jarvis-Builds/APKs	Tested
14. APK ON GITHUB	'build it on GitHub'	add build recipe	github_publish (scan + ALLOW)	GitHub builds 3-8 min	github_build_status downloads APK	Tested
15. PUBLISH TO GITHUB	'publish folder to GitHub'	keep-out list + secret scan	README if missing	ALLOW	push (never force) + verify	Tested
16. NIGHTLY LESSONS	1-6 am or 'go to lessons'	review today's turns	Gemini writes lessons + skills	test sheet: keep if not worse	mine Samasa ideas	Working
17. SELF-CHECK & REPAIR	switch to Opus / 'check yourself'	10 checks on real screen	failure -> Opus fixes a COPY	you ALLOW + restart	re-check: keep or restore	Tested
18. SWITCH BRAIN	'switch to Opus/Gemini/Qwen'	switch_brain	restart brain in place	confirms model name		Tested
19. SWITCH VOICE	'yakuza / rikuo voice'	switch_voice	Gemini acts the character	backup voice if busy	saved for next time	Built

Never: passwords • PINs/OTPs • payments • new accounts • keys on GitHub • pretending to be Dr Wolf • restarting himself
